

Bahrain uprising Anniversary!

SIX YEARS ago today February 14th, 2017, Bahraini citizens asked their monarchy to give them their Basic Human Needs (BHN) such as security, well-being and Esteem. Instead, ruling government present them with Arrest, torture, prison and execution. Creating largest prison in the world holding under age children, preventing them from creating the better world for themselves and their country.

But still, despite all the crimes done against them, Bahraini Shia have remained peaceful, hoping for better future.

We at Shia Rights Watch, convey our deepest gratitude to Bahraini citizens wishing them prosperity and peace. Knowing that international committee has failed to protect and prevent violence against them due to political interest.
